Jacob Spiegel

Pittsburgh, PA jspiegel@pitt.edu linkedin.com/in/Jacob-Spiegel-PhD/
Jacob-Spiegel.github.io/Jacob-Spiegel/

I am seeking to transition from academia to industry. I am self-motivated and a fast learner, and I love working on team-based collaborations.

With a Ph.D. in molecular biophysics, a Ph.D. minor in teaching, and a Bachelor of Engineering, I have a multi-disciplinary background. I have three years of computational biology, Python programming, and open-source tool-development experience, as well as ten years of wet lab experience. I hope to bring my diverse background in science, engineering, and communications to tackle interdisciplinary challenges.

Education

University of Pittsburgh 2014 – 2020
Ph.D in Molecular Biophysics and Structural Biology Pittsburgh, PA
- Thesis title: "Targeting the Poly (ADP-Ribose) Polymerase-1 Catalytic Pocket Using AutoGrow4, a Genetic Algorithm for *De Novo* Design"

Ph.D Minor in Teaching

Carnegie Mellon University 2013 – 2014
Ph.D. Student in Molecular Biophysics and Structural Biology Pittsburgh, PA

Stony Brook University 2009 – 2013
B.Eng. in Biomedical Engineering - Cellular and Molecular Biology Track Stony Brook, NY

Professional Experience

University of Pittsburgh 2013 – 2020
Ph.D. Candidate/Researcher in Dr. Jacob Durrant's laboratory Pittsburgh, PA
- Designed, developed, documented, and maintained multiple Python open-source programs for computer-aided drug designed (CADD) and cheminformatics; parallelized code for multiprocessing
- Applied CADD techniques to biological targets; performed molecular dynamic (MD) and weighted ensemble MD simulations on multiple proteins; performed protein homology modeling
- Completed independent and collaborative projects
- Authored scientific articles for publication
- Mentored, managed, and designed projects for/with undergraduate and graduate students

Ph.D. Candidate in Dr. Roger Hendrix's laboratory
- Studied bacteriophages using biochemical, molecular genetic, and X-ray crystallography techniques
- Engineered plasmids; designed protein purification protocols; purified proteins for X-ray crystallography

Stony Brook University 2011 – 2013
Undergraduate Researcher in Dr. Balaji Sitharaman's laboratory Stony Brook, NY
- Studied nanoparticle drug delivery system targeting cancer cells
- Designed alternative exfoliation protocol to produced graphene sheets from graphite
